CHRISTOPHER CLARET MAESTOSO

The Maestoso is a meticulous reinvention of a traditional pivoted detent escapement with a unique cylindrical balance spring. This type of escapement was first used in marine chronometers in the 18th century, mounted on gimbals to ensure an invariable position. It is mounted on stepped bridges in a dramatic open-worked movement. The watch is powered by four barrels for an 80-hour power reserve. The timepiece, which has three patents, was seven years in the making by the celebrated independent watchmaker.

JEAN D'ÈVE SECTORA 2000

To mark the passage to the third millennium, the SECTORA 2000 model offers a different way of displaying time by showing the hours and minutes on a linear index at a 120-degree angle on the dial. As soon as the hour or minute hand completes its cycle, it springs back immediately to its starting point. The patented Swiss made movement is a Jean d'Eve exclusivity. The case is stainless steel, with a gold plated finish, with a sapphire crystal. The watch is water resistant to 30 meters.

SZANTO VINTAGE CHRONOGRAPH 2401

The Szanto 2400 series is the dressiest in the collection with a fully polished softly curved case and a two-tone dial with a contrasting color minute track, with vintage hands and numeral font. The Szanto 2401 features a 46mm polished 316L stainless steel case, black and cream dial, domed mineral crystal, a rounded fluted crown, Japanese quartz chronograph movement and a leather strap with signature buckle. It is water resistant to 50 meters, and is priced at \$325.
